Author of "Aliens and the Scalpel," Dr. Leir has been said to be one of the worlds most important leaders in physical evidence research involving the field of Ufology. He and his surgical team have performed fifteen surgeries on alleged alien abductees. This resulted in the removal of fifteen separate and distinct objects suspected of being alien implants. These objects have been scientifically investigated by some of the most prestigious laboratories in the world. Dr. Leir anticipates performing more surgeries, as he investigates the biological aspects of the abduction phenomenon.
